

PENTAIR

GRO 1:1 RO

When Water Conservation is important...

...the Pentair GRO 1:1 saves water by producing half the waste-water of standard RO systems.

Pentair GRO 1:1 Water Conserving RO System

- TWICE as efficient over standard reverse osmosis membranes – less waste
- Low Waste Quick Connect 50 or 75 GDP Encapsulated Membrane (replaced in seconds with no tools)
- 1:1 Ratio of Purified Water to Waste Water (highly efficient)
- Makes 50 or 75 Gallons Per Day
- 3/8" Tank to Faucet line for higher flow
- Made In USA by Waterworld USA

5 Stage Water Conserving RO System

PENTAIR GRO 1:1 RO

Production: 50 or 75 GPD

Membrane Type: TFC

1st Stage: 5 micron Spun Polypropylene Sediment Filter

2nd & 3rd Stage: Coconut Shell 5 micron carbon block

4th Stage: 50 GPD or 75 GPD Low Waste RO Membrane with 1:1 Ratio

5th Stage: Inline GAC Carbon Fittings Type: Quick Connect

Fittings Type: Quick Connect

TDS Rejection: 96%

Recovery Rate: 50%

Tank Capacity: 3.2 Gallons

System Dimensions WxDxH: 15.5"x5.75"x15.5"

Tank Dimensions DxH: 11.5" x 16"

Shipping Weight: 31 Lbs

Shipping Dimensions: 20"x19"x19"

Option List:

- Low Waste Quick Connect 75 GPD Encapsulated Membrane (replaced in seconds with no tools)
- Use (2) Chloramine Carbon Blocks
- Private Labeling is available
